DIRECTION B · MODERN MEDIA SIGNAL

Slash

The slash is the brand. "arabs/startups" reads like a path: the region, then the sector. The same slash becomes the editorial system: /funding, /founders, /events.

CONSTRUCTION

Inter Tight Bold, outlined to vectors, spacing tightened 2.8%. The slash is the only colored element. Symbol: "a/" reversed out of an indigo square, usable as avatar, favicon and mic flag.

Arabic companion: IBM Plex Sans Arabic (OFL), a clean grotesk Arabic for news and data.

#0D0D12 #FFFFFF #4B3BFF

Palette is provisional; finalized in Stage 2.

STRENGTHS

- Most legible at small sizes; the heavy grotesk holds at 80 px wide.
- Strongest built-in system: the slash tags every category and post.
- Digital-native and fast for a lean team to produce.
- Clear word break without changing letters.

WEAKNESSES

- The slash adds a character: people may type "arabs/startups" or read it as a web address.
- The forward lean runs against Arabic right-to-left reading.
- Grotesk plus electric color can drift toward a SaaS or tech-product look.
- Slash devices are common in tech branding; ownership depends on consistent use.
